

Designing Your AAA Sequence

Use this section to map AAA at both scales: the full experience and the next lesson.

Name of Experience / Module / Pipeline:

Stage 1: Application

7. What real thing will the learner touch, test, make, or play with immediately?

The learner will immediately work with the expedition report website and explore the different scenes. They will test the buttons, read the information, and use the clues to understand what is happening in the story.

8. What productive friction do you want them to encounter here? What misconception should fail safely?

I want the learner to realize that the world is not going to be easy to understand and that they will have to look at the information carefully. A misconception could be thinking that everything is fine when the world starts to crumble, but they will learn that they need to pay attention to the clues.

Stage 2: Action

9. What are the 3-5 core concepts, definitions, or moves that should arrive only after Stage 1?

The main concepts are understanding the setting, identifying the main problem, finding important clues, making decisions, and understanding the consequences of those decisions.

10. How will the learner use those ideas to refine what they already began?

The learner will use these ideas to understand the story better and make better decisions as the story continues. They can use the clues they find to figure out what is happening and how they should respond.

Stage 3: Amplification

11. What bigger frameworks, professional practices, or collaborative contexts will open here?

This can connect to problem-solving, critical thinking, research, and organizing information. It can also involve working with others and using feedback to improve the final expedition report.

12. How does AAA work at the macro scale of the full experience and at the micro scale of one lesson or node?

At the macro scale, AAA takes the learner through the whole expedition report from discovering the problem to taking action and reaching an outcome. At the micro scale, each lesson or scene can have the learner apply something, take action, and then build on what they learned.
